

## Do you want faster, more reliable connectivity?

Try Cisco Meraki for FREE

### THE CHALLENGE

The existing Wi-Fi was not able to cope with the demand from the growing number of iPads and laptops within the school, and both teachers and pupils were finding it very frustrating and obstructive to the teaching and learning process. As an educational institution, budget was at the forefront of everyone's minds, but so was the need and desire to grow the school and offer exceptional technology facilities to inspire the children and add another dimension to lessons.

### THE SOLUTION

After discussions with various suppliers, Alan chose GGR due to their knowledge and openness with the options that were available. With GGR's expertise as a Cisco Premier Partner, the natural solution was Cisco Meraki. As the ideal choice it provided:

- **Reliability** - Enterprise Grade coverage with Cisco technology.
- **Scalability** - an expandable solution when additional coverage is required.
- **Management** - a web-based dashboard allowing visibility of the network at any point in time.

“The challenge for us was finding a simple and secure Wi-Fi solution to allow technology to be used throughout the school. Our Cisco Meraki AP was easy to set up and reliable from the moment we switched it on. I would highly recommend Cisco Meraki as a solution to anyone, together with GGR Communications' expertise.”

**Alan Ramsey, IT Manager**  
**The Hall School, Glenfield**

### BENEFITS

- **Peace of mind** - reliable equipment and 24 hour support from Cisco accredited engineers.
- **Ease of use** - the iPad Mobile Device Management allows the iPads and the wireless network to be managed under one system.
- **Flexibility for the future** - the Cisco Meraki AP set-up allows for more iPads and laptops to be added to the network over time, mirroring The Hall School's strategy. Additional AP's can also be integrated into the system for even further growth.
- **Increased speed** - the new wireless network offers seamless connectivity at a much faster speed. The new infrastructure has eliminated bottlenecks that were resulting from an increasing flow of data.

## WHAT DO I NEED TO DO?

Attend a live Cisco webinar and receive a FREE Cisco Meraki Access Point with a 3-year cloud management license. Cisco Meraki webinars are open to all audiences and APs may be offered at live events.

Visit [www.meraki.cisco.com/freeap](http://www.meraki.cisco.com/freeap) to find out more and view the upcoming webinars.

To be eligible you must:

- Be an IT professional.
- Attend the live webinar in its entirety.
- Provide a valid company name and website.
- Register with a shipping address in the UK.
- Register with your organisation's email address.
- Confirm eligibility and shipping address with a Cisco Meraki representative by phone.
- Only apply for one free AP per organisation and per individual.

## WHAT WILL I GAIN?

Cisco Meraki Access Points are built from the highest grade components and carefully optimised for a seamless user experience, giving you:

- **Faster connections**
- **Greater user capacity**
- **Increased coverage**
- **Fewer support calls**

The Cisco Meraki dashboard gives visibility into the network users, their devices, and their applications. Armed with rich analytics, administrators can quickly create access control and application usage policies, optimising both end-user experience and network security.

## FREE NETWORK STRATEGY REVIEW

Our experts will review your current network strategy at your convenience. We will work with you to provide options for tailor-made solutions that match the unique needs of your school.

Contact us now on **01905 825900** or [sales@ggr.net](mailto:sales@ggr.net).

## WHY PARTNER WITH GGR?

At GGR we pride ourselves on building strong and trusting relationships with the organisations that we work with. Customer service is at the heart of everything that we do and we take a personal approach to every project.

Our dedicated team of Cisco accredited experts will take the time to evaluate your current network strategy. We work with you to establish your priorities and goals for now and for the future. Getting the most out of your budget is critical, and so is ensuring that your network services are fully integrated and can contribute to achieving your overall objectives.

We take support seriously. From small changes to large ones, we will tailor our support to your skills and resources, ensuring a smooth transition and that you can take full advantage of your unified services.
